### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Election/Restrictions*

1. Claims 16-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 8-30-04.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1,3-10,12-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whan-Tong et al in view of Shu et al. Whan-Tong et al discloses all of applicant's claimed invention except for the use of electrical energy storage and a microprocessor powered by a generator.

Shu et al discloses a self contained exercise device which does not require an outside power source by utilizing a generator, battery and microprocessor which is supplied energy. Given this teaching, it would have been obvious to one skilled in the art to provide the Whan Tong device with a self contained energy source and generator for self-powered purposes.

Art Unit: 3764

As to claims 6 and 15, if not inherent, it would have been well within the purview of one skilled in the art to power the device via the battery for any desired predetermined time period.

Claims 2 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Whan-Tong et al in view of Shu et al as applied to claims 1 and 9 above, and further in view of Hampl.

Hampl discloses an exercise device having user foot supports 17, generators 10a and 19, battery 30a, and a three phase generator. Note figure 3. Hampl states:

"Generator 10 is a three phase generator having a permanent magnet armature and three stator windings of which only two stator windings 12 and 12' are illustrated.

In view of this teaching, it would have been obvious to one skilled in the art to provide the Whan Tong et al elliptical device with a common three-phase generator.

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
